

Company Vital Signs Executive
Summary Prepared For
Sample Company
Provided by:

We at SOAR, Inc wish to express our appreciation for the opportunity to work with your great company and your wellness program. We commend you for your proactive thinking and approach to managing employee health care. In this report we will summarize the current health status of your organization and review your company's "Vital Signs".

These Vital Signs include:

- Group Primary Health Findings
- Risk Presence and Prevalence
- Disease Status
- Newly Discovered Conditions
- Excess Costs and Economic Impact Associated with Risks
 - Excess Medical Claims
 - Absenteeism Cost
 - Productivity and Performance Cost
- Recommendations and Potential Savings

Contents

Top Ten Killers and Top Ten Most Expensive Health Conditions

Demographics and General Health Findings

Coronary and Stroke Risk

Cancer Risk

Diabetes Risk

Mental Disorders Risk

Other Conditions Risk

Current Disease Status

Health Practices

Nutrition and Eating Habits

Exercise and Physical Activity

Substance Use

Stress Management and Coping Skills

Absenteeism Costs

Productivity Costs

Cardio and Functional Testing Results

Costs per Condition

Excess Medical Claims

This report is not a diagnostic tool. The presence of a risk factor increases the probability of a chronic health condition but it does not assure that a condition will develop. The more risk factors present, the greater the probability.

National Top Ten Killers

Center for Disease Control's Top Ten Killers Men	Percentage	Center for Disease Control's Top Ten Killers Females	Percentage
1) Heart disease	26.3	1) Heart disease	25.8
2) Cancer	24.1	2) Cancer	22.0
3) Unintentional injuries	6.6	3) Stroke	6.7
4) Chronic lower respiratory diseases	4.9	4) Chronic lower respiratory diseases	5.3
5) Stroke	4.5	5) Alzheimer's disease	4.2
6) Diabetes	3.0	6) Unintentional injuries	3.5
7) Suicide	2.2	7) Diabetes	3.0
8) Influenza and pneumonia	2.1	8) Influenza and pneumonia	2.5
9) Kidney disease	1.8	9) Kidney disease	1.9
10) Alzheimer's disease	1.8	10) Septicemia	1.5

General Demographics and Group Primary Health Findings

General Demographics	Number	% Of Group
Total Persons Screened	142/150	95%
Men	65	43%
Women	77	51%
Participants Over Age 45 Men	34	23%
Participants Over Age 45 Women	45	30%
Persons with conditions that warrant follow-up with a physician	140	93%
Persons who have not had any recommended preventative health screenings	46	31%
Body Mass Index Normal	37	25%
Body Mass Index Overweight	49	33%
Body Mass Index Obese	56	37%

Overall Wellness Risk Levels	Number	% Of Group
Persons who are considered overall Low risk	5	3%
Persons who are considered overall Moderate Risk	34	23%
Persons who are considered overall High Risks	95	63%
Persons who are considered overall Very High Risk	8	5%

Biometric and Clinical Testing Risk Levels	Number	% Of Group
Persons who are considered Optimal Risk	28	19%
Persons who are considered Low Risk	49	33%
Persons who are considered Moderate Risk	36	24%
Persons who are considered High Risk	29	19%

Company Risk Levels

33% of the Employees' BIOMETRIC AND CLINICAL TESTING at Sample Company fall in the LOW Category

Clinical Results	Number	% Of Group
Total Cholesterol:		
Less than 200 (Low Risk)	80	53%
200 – 239 (Moderate Risk)	46	31%
240+ (High Risk)	16	11%
HDL Cholesterol:		
Greater than 40 Men (Low Risk)	42	28%
Greater than 50 Women (Low Risk)	50	33%
30 – 39 Men (Moderate Risk)	15	10%
40 – 49 Women (Moderate Risk)	16	11%
Less than 30 Men (High Risk)	8	5%
Less than 40 Women (High Risk)	11	7%
LDL Cholesterol:		
Less than 129 (Low Risk)	94	63%
130 – 159 (Moderate Risk)	34	23%
160 – 189 (High Risk)	6	4%
190+ (Very High Risk)	8	5%
Blood Glucose:		
1 - 70 Hypoglycemic (Moderate Risk)	1	1%
71 – 99 Normal (Low Risk)	98	65%
100 – 125 Pre-Diabetic (Moderate Risk)	34	23%
126+ Diabetic (High Risk)	9	6%
Triglycerides:		
Less than 150 (Low Risk)	99	66%
150 – 199 (Borderline High)	16	11%
200 – 488 (High Risk)	24	16%
500+ (Very High Risk)	3	2%
Blood Pressure:		
Below 120/80 (Normal Blood Pressure/Low Risk)	31	21%
120 – 139/ 80 – 89 (Pre-Hypertension/Moderate Risk)	32	21%
140 – 159/ 90 – 99 (Stage 1 Hypertension/High Risk)	10	7%
160+/100+ (Stage 2 Hypertension/Very High Risk)	1	1%

Clinical Testing Moderate to High Risk

Clinical Results	Number	% Of Group

Perceived Health	Number	% Of Group
I am in great health and I am as healthy as anyone I know	119	79%
I seem to get sick more often than other people.	7	5%
I think I need to see a doctor about my health.	8	5%
I think my health is failing and going to get worse.	1	1%
I have a serious health problem I do not expect to go away or get better.	7	5%

Perceived Health Moderate to High Risk

Coronary, Cardiovascular and Stroke Risk

Risk Levels	Number	% Of Group
Persons who are considered Low risk	50	33%
Persons who are considered Moderate Risk	71	47%
Persons who are considered High Risk	21	14%

Heart Disease and Stroke are responsible for over 30% of all deaths in the United States and are the most expensive Health Conditions!

Number Of Coronary Risks Per Person	Number	% Of Group
Persons with 0 Coronary Risks	5	3%
Persons with 1 Coronary Risk	17	11%
Persons with 2 Coronary Risks	28	19%
Persons with 3 Coronary Risks	42	28%
Persons with 4 Coronary Risks	29	19%
Persons with 5 Coronary Risks	16	11%
Persons with 6+ Coronary Risks	5	3%

Cancer

Risk Levels	Number	% Of Group
Persons who are considered Low risk	13	9%
Persons who are considered Moderate Risk	41	27%
Persons who are considered High Risk	88	59%

70% of Cancer Risk Factors are Preventable!

Number Of Cancer Risks Per Person	Number	% Of Group
Persons with 0 Cancer Risks	2	1%
Persons with 1 Cancer Risk	2	1%
Persons with 2 Cancer Risks	9	6%
Persons with 3 Cancer Risks	21	14%
Persons with 4 Cancer Risks	20	13%
Persons with 5 Cancer Risks	25	17%
Persons with 6+ Cancer Risks	63	42%

Diabetes

Risk Levels	Number	% Of Group
Persons who are considered Low risk	28	19%
Persons who are considered Moderate Risk	71	47%
Persons who are considered High Risk	43	29%

\$1.00 Out of Every \$10.00 Spent on Health Care in the United States is Related to Diabetes

Number Of Diabetes Risks Per Person	Number	% Of Group
Persons with 0 Diabetes Risks	1	1%
Persons with 1 Diabetes Risk	9	6%
Persons with 2 Diabetes Risks	18	12%
Persons with 3 Diabetes Risks	37	25%
Persons with 4 Diabetes Risks	34	23%
Persons with 5 Diabetes Risks	27	18%
Persons with 6+ Diabetes Risks	16	11%

Mental Disorders

Risk Levels	Number	% Of Group
Persons who are considered Low risk	0	0%
Persons who are considered Moderate Risk	82	55%
Persons who are considered High Risk	40	27%

**The American Journal of Health Promotion states that
 "Employees who are at risk for stress and depression expend 46% to 70% higher medical costs respectively to those are not at risk."**

Number Of Mental Risks Per Person	Number	% Of Group
Persons with 0 Mental Risks	0	0%
Persons with 1 Mental Risk	4	3%
Persons with 2 Mental Risks	16	11%
Persons with 3 Mental Risks	39	26%
Persons with 4 Mental Risks	43	29%
Persons with 5 Mental Risks	16	11%
Persons with 6+ Mental Risks	24	16%

Chronic Diseases or Medical Conditions Status

Condition Or Disease	# Group	% Of Group	Newly Discovered
Cancer	10	7%	1
Diabetes	45	30%	34
Heart attack or other coronary or cardiovascular diseases	4	3%	
Stroke	1	1%	
High Blood Pressure	64	43%	36
Arthritis	6	4%	
Alcoholism	0	0%	
Other physical degenerative diseases (Multiple Sclerosis, Muscular Dystrophy ext)	2	1%	
Chronic back pain	7	5%	
High Cholesterol	82	55%	43
Allergies	0	0%	
Asthma or other respiratory conditions	17	11%	
Depression or Anxiety	22	15%	
Kidney Disease	2	1%	1
Liver Disease	25	17%	23

Conditions With Medication Prescribed	83	Taken As Prescribed	73	Not Taken	10
Conditions With Treatment Plan Prescribed	49	Plan Followed	47	Not Followed	2

Group Health Practices Nutrition and Eating Habits

Perceived Nutrition And Eating Habits		% Of Group
Number of Employees who thought they had good eating habits	46	31%
Number of Employees who thought they had poor eating habits	4	3%
Actual Nutrition And Eating Habits		% Of Group
Number of Employees with good eating habits	46	31%
Number of Employees with fair eating habits	12	8%
Number of Employees with poor eating habits	84	56%

Physical Activity

Perceived Physical Activity Levels		% Of Group
Number of Employees who thought they had healthy physical activity levels	47	31%
Number of Employees who thought they had poor physical activity levels	15	10%
Actual Physical Activity Levels		% Of Group
Number of Employees with healthy physical activity levels	61	41%
Number of Employees with fair physical activity levels	55	37%
Number of Employees with poor physical activity levels	26	17%

Substance Use / Safety Practices

Substance	% Of Group Who Are Medium To High Risk
Alcohol	5%
Tobacco	17%
Other drugs or medications	11%
Safety Practices	0%

Stress Management and Coping Skills

Life Area	Number and % of Stress Levels Medium to High Risk	
Relationships	67	45%
Finances	101	67%
Health	86	57%
Employment	56	37%
Emotional/Environmental	48	32%

Group Average Stress Score for Relationships

3.44

Group Average Stress Score for Finances

3.26

Group Average Stress Score for Health

3.88

Group Average Stress Score for

Employment

3.35

Group Average Stress Score for
Emotional/Environmental

3.40

Group Total Average Stress Score

3.47

A level/score of 0-3 in a particular area is indicative of healthy stress levels and good stress management skills.

A level/score of 4-6 is indicative that there are some concerns starting to arise and we should address them sooner than later.

A level/score of 7-10 is indicative that there are major problems that need to be addressed immediately to avoid dangerous physical and emotional effects.

Economic and Productivity/Performance Impact Report Absenteeism Costs

Condition	Average Annual Lost Work Days P/Person	Number With Or At Risk Of This Condition	Potential Annual Economic Impact

Potential Savings Possible by Preventing or Managing Conditions

10% Reduction = Savings of \$31,365.80

20% Reduction = Savings of \$62,731.60

30% Reduction = Savings of \$94,097.40

The above are not precise numbers. They are estimates based on the number and severity of untreated medical conditions discovered. |

SOAR, Inc. DOES NOT MAKE MEDICAL DIAGNOSES.

Employee willingness to change perception on higher premium

Employees were asked the following questions.

Question 1:

What is your personal willingness to change your lifestyle and habits in order to improve your health now and in the future?

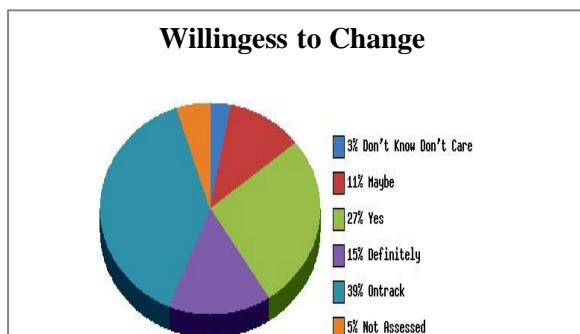

1. Don't know Don't Care
2. Maybe, let me think about it.
3. Yes, I just need some help getting started.
4. Definitely yes let's get started right now.
5. I feel that I am on track right now and I will do whatever it takes to stay that way.

Question 2:

Do you feel if someone in your group is unwilling to take care of their personal health and are driving up the group's health premium costs, they should pay a higher premium?

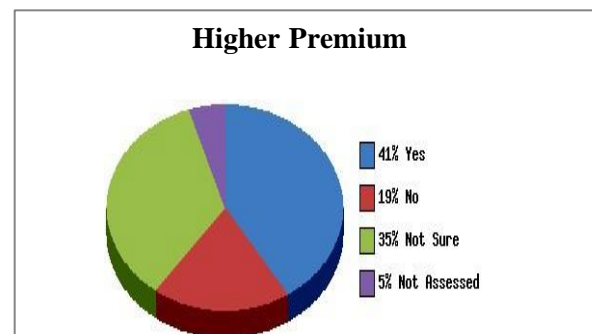

Yes... No... Not sure...

Question 1

42% of the Group is willing and wants help to change their lifestyle and their health practices!

Question 2

41% of the Group feels that people who are unwilling to take care of their health should pay a higher premium!
